VOLUME CONTENTS

1994 VOLUME 39 NUMBER 1

T. Ye. Krendeleva and A. B. Rubin — 1 — Structuro-functional organization of chloroplast membranes in plants with a high CO_2 fixation rate

M. A. Ostrovskii and I. B. Fedorovich — 9 — Retinal as sensitizer of photodamage to retinal-containing proteins of the retina of the eye

N. Ya. Dodonova, N. M. Tsyganenko, Ye. A. Kuzicheva and M. B. Simakov — 21 — Abiogenic synthesis of uridine nucleotides on exposure to vacuum ultraviolet radiation

Molecular Biophysics

T. A. Lozinova, O. N. Brzhevskaya and O. S. Nedelina — 27 — Single-electron oxidation of adenine nucleotides photosensitized by ferricyanide and riboflavin

K. M. L'vov and A. A. Iskakov — 37 — Transformation of $-NH-\dot{C}R-CO-$ macroradicals in proteins

V. V. Novikov and M. N. Zhadin — 41 — Combined action of weak constant and variable low-frequency magnetic fields on ionic currents in aqueous solutions of amino acids

M. A. Semenov, T. V. Bol'bukh, V. A. Kashpur, V. Ya. Maleyev and G. M. Mrevlishvili — 47 — Hydration and stability of the B-form of LiDNA

Cell Biophysics

T. S. Dyubko, G. P. Gorbenko, O. A. Nardid and V. A. Moiseyev — 55 — Investigation of the influence of low temperatures and organic solvents on the structure of model membranes using fluorescent probes

V. V. Shlygin, G. V. Maksimov and T. A. Chokharadze — 61 — Carotinoids of the excitable membrane on generation of action potentials and in the resting state

O. V. Braginskaya, V. V. Lazarev, O. V. Tikhonova and V. B. Shneider — 67 — Role of binding of sodium fluorescein dye in the course of its accumulation in the cells

A. B. Gapeyev, N. K. Chemeris, Ye. Ye. Fesenko and R. N. Khramov — 73 — Resonance effects of a low-intensity modulated extremely high frequency field. Change in the motor activity of the unicellular protozoa *Paramecium caudatum*

Biophysics of Complex Systems

A. A. Timoshin, V. L. Lakomkin and E. K. Ruuge — 83 — Interaction of spin traps with perfused rat hearts: a study based on the interrupted flow method

M. Ivanova and G. Georgiyev — 87 — Determination of the limiting adsorption of solutions of the non-ionogenic surfactant LF-57 after acting on urinary calculi formed by uric acid

F. I. Ataullakhanov and G. T. Guriya — 91 — Spatial aspects of the dynamics of blood clotting — I. Hypothesis

F. I. Ataullakhanov, G. T. Guriya and A. Yu. Safroshkina — 99 — Spatial aspects of the dynamics of blood clotting — II. Phenomenological model

S. A. Regirer and N. Kh. Shadrina — 109 — Mathematical description of the movement of blood in a microvascular module of the skeletal muscle

T. V. Vengrus, G. N. Zatsepina, M. N. Kramskoi and N. N. Goryunov — 119 — Various changes in the mean membrane potential and volume of the T-lymphocytes of mice of the Balb C line present in different physiological states of the body in media with a different D_2O content

N. A. Karnaukhova, L. A. Sergiyevich and G. Ye. Aksenova — 127 — Change in the fluorescent characteristics of acridine orange-stained rat blood lymphocytes after acute γ-irradiation

M. N. Zhadin — 133 — Formation of rhythmic processes in the bio-electrical activity of the cerebral cortex

A. V. Karnaukhov — 151 — Problem of the stability of the chemical composition of the atmosphere and the thermal balance of the Earth

Discussion

N. P. Sidorenko and A. A. Klimov — 157 — Shortening of thick filaments as a consequence of sliding of the filaments

Letters to the Editors

G. B. Murzina — 161 — Mathematical model of the participation of different states of the receptor in the creation of short-term synaptic plasticity

163 Annotations of papers deposited in VINITI

167 Reviews

171 Current Events

1994 VOLUME 39 NUMBER 2

A. B. Rubin, A. A. Kononenko, K. V. Shaitan, V. Z. Pashchenko and G. Yu. Riznichenko — 173 — Electron transport in photosynthesis

A. A. Krasnovskii Jr — 197 — Singlet molecular oxygen: mechanisms of formation and paths of deactivation in photosynthetic systems

Molecular Biophysics

K. M. L'vov, S. V. Kuznetsov, S. V. Bibikov and A. P. Kostikov — 213 — Inductive-resonance energy transfer between tryptophan molecules in the triplet-excited state

V. B. Il'yasova, A. A. Buzukov, M. Tabak and I. A. Degterev — 219 — Mechanism of metabolic denitration of nitroheterocyclic compounds

A. V. Barmasov, V. I. Korotkov and V. Ye. Kholmogorov — 227 — Model photosynthetic system with charge transfer for transforming solar energy

T. N. Kalabukhova — 233 — Processes occurring in ergosterol crystals on exposure to ultraviolet radiation at different temperatures

E. Sh. Yakutova, Ye. S. Dremina, S. A. Yevgina, A. N. Osipov, V. S. Sharov, O. M. Panasenko and Yu. A. Vladimirov — 241 — Formation of free radicals on interaction of hypochlorite with iron (II) ions

Ye. B. Kruglova — 247 — Spectrophotometric analysis of the processes of cooperative binding in the polyphosphate-coloured ligand system

L. F. Sukhodub, L. I. Grebenik and V. D. Chivanov — 257 — Application of flight time mass spectrometry with ionization by the fission fragments of californium-252 to study of the mechanisms of action of medicinal preparations on DNA and its components

V. Yu. Makeyev and V. G. Tumanyan — 263 — Link between the methods of internal homologies, correlation functions and Fourier analysis in the search for periodicities in the primary structures of biopolymers

A. I. Dragan, M. Yu. Sushko and S. N. Khrapunov — 267 — Reaction of fluorescamine with nitrogenous bases as part of the nucleotides and single-strand synthetic and natural oligonucleotides

V. I. Sukhorukov, M. M. Montrel', G. B. Sukhorukov and L. I. Shabarchina — 273 — Optical properties and structure of Langmuir films of complexes on nucleic acids with lipids and synthetic amphiphilic molecules—I. Infrared spectra, structure and hydration of a multilayer Langmuir film of a complex of polyuridylic acid with octadecylamine

N. K. Balabayev, A. L. Rabinovich and P. O. Ripatti — 283 — Simulation of the dynamics of polyunsaturated lipids of biological membranes

Cell Biophysics

O. P. Bondar', P. A. Voziyan, S. D. Danchuk, D. I. Kurlyand and Yu. D. Kholodova — 295 — Influence of cholesterol and dicetyl phosphate on the physical parameters of the liposomes

B. M. Borovik and Ye. V. Popov — 301 — Structural ordering in a model biomembrane

V. A. Loginov — 307 — Thermodynamic effectiveness of the active transport of calcium ions

A. V. Melkikh and V. D. Seleznev — 313 — Effectiveness of energy conversion during active ion transport in the biomembrane

T. Yu. Plyusnina, G. Yu. Riznichenko, S. I. Aksenov and G. M. Chernyakov — 321 — Effect of a weak electrical action on the trigger system of transmembrane ion transfer

V. N. Buravtsev, A. V. Gurevich and T. I. Makarova — 327 — Stabilization of a conducting channel in bilayer lipid membranes by the electric field

Ye. A. Chernitskii, Ye. I. Slobozhanina, I. Ye. Fedorovich and G. P. Novitskaya — 333 — Vesiculation of erythrocytes on their storage and its link with other processes in the cell

L. K. Stus' — 339 — Acid haemolysis of erythrocytes as a function of temperature and storage times

Biophysics of Complex Systems

F. V. Burdyga, L. G. Babich, T. T. Taran and S. A. Kosterin — 343 — The calcium pump of the sarcolemma controls relaxation of the smooth muscle

V. P. Makhnev	351	Functional model of the electric potential of the skin
I. Z. Nemtsev, V. P. Okhotskii, Ye. A. Chukina and V. P. Lapshin	357	Investigation of the duration of the period of refractoriness of excitable membranes in patients using biological feedback to the apparatus of interference currents
T. P. Ryabykh, A. I. Chertkova, N. B. Bodrova and A. P. Suslov	361	Inverse correlation between the natural resistance of mice to inoculated leukaemia EL-4 and rectal temperature
A. A. Yudashkin	367	Modelling of pattern recognition in real neural structures
A. B. Avakyan	373	Influence of mixed viral infection on the delayed fluorescence of potato leaves
A. A. Ivlev, N. Yu. Panteleyev, Yu. A. Knyazev, M. V. Logachev and Yu. M. Miller	377	Daily variations in the isotope composition of the carbon of the CO_2 of the expired air in humans in the presence of certain metabolic disturbances

1994 VOLUME 39 NUMBER 3

Molecular Biophysics

K. M. L'vov and O. Sow	385	Quenching of tryptophan luminescence by the products of its photolysis
I. I. Vlasova, V. P. Denisov and S. P. Kuprin	391	Recording the conformational changes of enzymes in solution by proton magnetic relaxation
N. S. Shelud'ko, B. A. Tikunov, I. V. Kropacheva, T. V. Permyakova and Yu. K. Yudin	401	Mechanism of the two-stage kinetics of superprecipitation of actomyosin
S. V. Kornilova, L. Ye. Kapinos, A. Tomkova, P. Mishkovskii, Yu. P. Blagoi and T. V. Bol'bukh	407	Study by infrared and Raman spectroscopy of the interaction of DNA with copper ions
Ye. M. Mil', V. M. Zhil'tsova, V. I. Binyukov, G. P. Zhizhina, L. G. Stolyarova and Yu. P. Kuznetsov	421	Influence of the structure of preparations of the benzimidazole class on the character of the formation of intramolecular crosslinks in DNA and chromatin
A. N. Danilenko, Ye. V. Shtykova and V. P. Yur'ev	427	Equilibrium and the cooperative unit of the process of melting of native starches with different packing of the macromolecular chains in the crystallites

Cell Biophysics

N. V. Kapusta and P. P. Zak	433	Extracellular photoreceptor potential of the white rat
N. S. Kudryasheva, Ye. V. Shalayeva, Ye. N. Zadorozhnaya, V. A. Kratasyuk, A. E. Balayan and D. I. Stom	441	Patterns of inhibition of bacterial bioluminescence *in vitro* by quinones and phenols—components of sewage
N. V. Verkhovtseva, V. F. Babanin, A. G. Solomonov, A. M. Shipilin and I. V. Shpil'kina	453	Mössbauer data on the influence of NAD·H on the state of iron in bacteria
I. B. Zavodnik, Ye. A. Lapshina and I. I. Stepuro	459	Thermostability of erythrocyte membranes in the presence of ethanol
A. A. Maksina, N. P. Mikaelyan, B. A. Dainyak and Yu. A. Knyazev	465	Recording by the spin-probe method of the changes in the surface potential of the membranes of erythrocytes in the blood of patients with insulin-dependent sugar diabetes
A. M. Taranenko and Ye. Ye. Sel'kov	471	Analysis of a mathematical model of the cell clock describing the mechanism of suppression of parasitic recirculation of substrates
G. I. Ovchinnikova and Ye. F. Korosteleva	477	Mechanism of absorption of microwave radiation by biological membranes
M. B. Golant, A. P. Kuznetsov and T. P. Bozhanova	483	Mechanism of synchronization of a yeast cell culture by e.h.f. radiation

Biophysics of Complex Systems

G. A. Isayeva and P. P. Isayev	489	Mathematical modelling of the interaction of local anaesthetics with the surface of the biomembrane of the nerve fibre
A. A. Timoshin, O. V. Tskitishvili, L. I. Serebryakova, A. I. Kuz'min, O. S. Medvedev and E. K. Ruuge	495	Formation of hydroxyl radicals in local ischaemia of the canine heart
L. V. Nedorezov and B. N. Nedorezova	501	Non-parametric model of the regulation of the level of arterial pressure by the system of most rapid mechanisms
G. N. Zatsepina, N. N. Goryunov, T. O. Yeliseyeva, D. K. Malyshev and S. V. Tul'skii	507	Study of the changes in the fine structure of a constant electric field of humans in a number of diseases of the eye

V. A. Pestryayev 511 Controllable action of a pulse electromagnetic field on the central nervous system

Letters to the Editors

A. N. Pokrovskii 515 Approximation of the kinetics of the transitions between states of potential-dependent ionic channels

Conference

A. O. Kasumyan 519 Olfactory sensitivity of the sturgeon to free amino acids

A. O. Kasumyan and S. S. Sidorov 523 Comparison of intra- and extra-oral taste responses to free amino acids in three sturgeon species of the genus *Acipenser*

N. Ye. Lebedeva, V. I. Lebedev and T. V. Golovkina 527 Pheromone of the trout—stress inducer

N. Ye. Lebedeva and T. V. Golovkina 531 Natural chemical signals in fish—their significance and some properties

O. S. Gladysheva and V. T. Troitskaya 535 Endocrinal control of olfactory reception

V. T. Troitskaya and O. S. Gladysheva 541 Relationship between neurogenesis and the electrical responses of the olfactory receptors

Discussion

V. A. Buevich and V. A. Yanin 547 Some patterns in the frequency distribution of the self-excited oscillations of the neuromuscular system

Current Events

553 Nataliya Georgiyevna Yesipova (on her birthday)

555 Erratum

1994 VOLUME 39 NUMBER 4

Molecular Biophysics

V. I. Lobyshev, B. D. Ryzhikov, R. E. Shikhlinskaya and T. N. Mazurova 557 Intrinsic luminescence of water and heavily diluted solutions of dipeptides

G. A. Vashanov and V. G. Artyukhov 565 Structuro-functional changes in human haemoglobin induced by ultraviolet light and serotonin

V. G. Artyukhov, M. A. Nakvasina and V. V. Popova 571 Thermo-induced changes in the structuro-kinetic properties of lactic dehydrogenase

T. A. Zenchenko and V. N. Morozov 579 Influence of strain on the catalytic activity of carboxypeptidase A in the crystalline state

A. I. Gasan, V. A. Kashpur and V. Ya. Maleyev 585 Thermal rearrangements and hydration of serum albumin

O. S. Klyachko, Ye. S. Polosukhina, A. A. Bulychev and N. D. Ozernyuk 591 Change in the functional properties of lactic dehydrogenase during maturation of fish oocytes

V. R. Fed'kina and T. V. Bronnikova 597 Bistability and birhythmicity in the peroxidase−oxidase reaction

L. S. Kivayeva and V. P. Kutyshenko 607 Analysis of the line form in the ^1H nuclear magnetic resonance spectrum of carboanhydrase B in the molten globule state—I. Influence of intramolecular movements of high amplitude on secondary shifts

V. A. Krayevskii, V. M. Panin and S. V. Razin 613 Acetylation of histones *in vitro* causes decompactization of chromatin

V. A. Krayevskii, V. M. Panin and S. V. Razin 621 Dependence of the process of condensation of chromatin on the temperature and ionic strength of the medium: investigation using gel electrophoresis in low density agarose

M. A. Semenov, D. A. Matveyev, T. V. Bol'bukh and V. Ya. Maleyev 631 Hydration and stability of the bihelical complex poly(dA)−poly(dT)

Yu. P. Blagoi, S. V. Kornilova, V. S. Leont'ev, V. A. Sorokin, G. O. Gladchenko, V. A. Valayev, D. N. Grigor'ev, L. Ye. Kapinos, V. N. Bondarenko and V. Ya. Kolod 641 Structural and physicochemical characteristics of DNA of animal tissues exposed to prolonged chronic irradiation in the Chernobyl zone

Cell Biophysics

D. S. Chernavskii 651 Alternative model of the functioning of bacteriorhodopsin and the unusual properties of the K_{610} intermediate

A. Yu. Dubinskii and A. N. Tikhonov 657 Regulation of electron and proton transport in the chloroplasts. Kinetic model and comparison of it with the experiment

V. D. Nemirovskii, L. A. Gusarova, V. G. Kostenko and M. A. Trushule — 671 — Correlations between the biological activity and physicochemical properties of amides, azomethines and acids of furan and the rate of their biotransformation on exposure to yeasts

F. I. Ataullakhanov, V. M. Vitvitskii, I. L. Lisovskaya and Ye. G. Tuzhilova — 677 — Analysis of the geometric parameters and mechanical properties of erythrocytes by the method of membrane nuclear filtration. 1. Mathematical model

Z. S. Toktamysova and G. M. Kairakbayeva — 687 — Effect of phenazine methosulphate on human erythrocytes

B. Balmukhanov and A. Basenova — 693 — Influence of the chlorine diffusion potential on the electrophoretic mobility and sedimentation of erythrocytes in dilute suspension

I. V. Yamaikina and Ye. A. Chernitskii — 699 — Haemolysis of human erythrocytes by haemin. Role of haemin in the autohaemolysis of erythrocytes

V. P. Korchagin — 705 — Dependence of the rate of contraction of the myofibrils on the concentration of MgATP. Theoretical analysis

Biophysics of Complex Systems

F. K. Zakir'yanov, A. K. Kukushkin and Ye. A. Soldatova — 713 — Theoretical study of delayed fluorescence of chlorophyll in the leaves of higher plants

A. A. Timoshin and E. K. Ruuge — 721 — Study of the interaction of rat myocardial tissue with nitroxyl radicals

F. I. Ataullakhanov, R. I. Volkova, A. V. Pokhilko and Ye. I. Sinauridze — 725 — Threshold behaviour of the blood coagulation system with change in the calcium concentration

M. S. Livshits — 733 — Self-regulation in the auditory analyser and the phenomenon of acceleration of increase in loudness

A. B. Goryachev, A. A. Polyezhayev and D. S. Chernavskii — 739 — Problem of the stability of coexistence in a confined area in models of competing populations

V. V. Obraztsov, Yu. S. Tarakhovskii, V. V. Ponomarchuk and S. I. Sklifas — 745 — Biophysical mechanisms of the toxicity of fluorocarbon emulsions

I. I. Manyanin — 751 — Dependence on the efficacy of inhibition on the localization of the inhibitory synapses on the dendrites of the neuron. Mathematical modelling

V. G. Sidyakin — 757 — Animal behaviour against the background of long-period heliogeophysical fluctuations

Letters to the Editors

N. P. Bazhulina, S. V. Korolev, N. Yu. Morozov, V. N. Rogulenkova and N. G. Yesipova — 763 — Laevohelical (PPII-PPII) type of the structure of globular protein: in the Kunitz trypsin inhibitor the content of the left helix of the poly-L-proline II type is not less than 43%. Experimental reference spectrum of the extended left helix

769 — Abstracts of papers deposited in VINITI

1994 VOLUME 39 NUMBER 5

Molecular Biophysics

K. M. L'vov and A. A. Iskakov — 773 — Effect of water and the secondary structure on the thermostability of macroradicals in proteins

V. M. Kochkina, S. V. Korolev, V. I. Meador, D. Wilson, F. A. Quiocho and A. P. Kuzin — 779 — Investigation of the complex aspartate aminotransferase with *D*-aspartate

A. Ya. Avanov — 785 — Investigation of the spatial organization of a globular fragment of calmodulin I. Conformational analysis of the structure of the domain

Ye. G. Frank, L. S. Reshetnikova, V. N. Ankilova, M. M. Chernaya and N. G. Yesipova — 803 — Comparative study of the thermostability of phenylalanyl-tRNA synthetases of *Escherichia coli* MRE-600 and *Thermus thermophilus* HB 8

L. S. Kivayeva and V. P. Kutyshenko — 809 — Analysis of the line form in the ^{1}H-nuclear magnetic resonance spectrum of carbo-anhydrase B in the molten globule state—II. Line form calculated as the superposing of a multiplicity of signals

G. I. Tsereteli and T. V. Belopol'skaya — 815 — New data on the thermal denaturing of collagen fibrils

Ye. M. Belavtseva, N. U. Ibragimova, M. Z.-V. Vagabov and I. P. Shilov — 817 — Study of the structure of gelatine gels in the scanning electron microscope

V. A. Sorokin, V. A. Valeyev, G. O. Gladchenko and Yu. P. Blagoi — 821 — Features of the interaction of bivalent metal ions with homopolynucleotides in the multichain conformation

V. A. Tronov, Ye. V. Grin'ko, G. G. Afanas'ev and I. V. Filippovich — 833 — Gel-microelectrophoresis study of the vulnerability of DNA and the heterogeneity of the cells

V. F. SERZHANOV, G. I. LIKHTENSHTEIN, L. A. LEVCHENKO, I. I. KOVALENKO and A. P. SADKOV	845	Statistical analysis of the electron photomicrographs of bio-objects tagged with electron-dense mercarbide labels
V. V. NOVIKOV	851	Initiating action of weak magnetic fields on the formation of intermolecular bonds in aqueous solutions of amino acids
D. R. MONASELIDZE, YA. L. KALANADADZE, D. G. KHACHIDZE and I. TOPURIDZE	857	Microcalorimetric investigation of the effect of mitoxanthrone on chromatin DNA *in vivo*
V. M. KOMAROV	863	Non-coplanar H-binding of the Hugstein base pairs. PCILO conformational evaluations. I. Adenine–adenine and adenine–thymine pairs
		Cell Biophysics
YU. S. SHUMOV	869	Galvanodynamic photoeffect in films of pigments contacting the electrolyte. Maximum value of the photopotential of phthalocyanin films polarized by a current source
O. V. PARUSH, R. G. SADYGOV and A. K. KUKUSHKIN	875	Influence of the asymmetry of the polar environs of the dimer of the reaction centre on the process of electron transport
B. V. ZUBOV, R. LOZIER, D. S. CHERNAVSKII and I. V. CHIZOV	883	Physical model of proton transfer in the relaxation part of the photocycle of bacteriorhodopsin
I. L. LISOVSKAYA, F. I. ATAULLAKHANOV, YE. G. TUZHILOVA and V. M. VITLITSKII	893	Analysis of the geometric parameters and mechanical properties of erythrocytes by filtration through nuclear membrane filters II. Experimental check on a mathematical model
A. R. ZARITSKII, YE. V. PEREVEDENTSEVA, G. A. PROKOPENKO, M. V. FOK and V. S. PRONIN	903	Investigation of the diffusion of glucose across the erythrocyte membrane
P. M. KRASIL'NIKOV and O. I. FISUN	909	Natural vibrations of charged spherical membranes
V. A. MONICH	915	Effect of low intensity luminescent radiation on erythrocyte membranes
N. P. SIDORENKO	919	Possible functional role of "helix-to-coil" transitions in the rod part of myosin in muscular contraction
		Biophysics of Complex Systems
